DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claims 2-4, 6-10, 12, and 14-25 are canceled based on the non-elected without traverse dated 8/7/2006.

Response to Arguments

2. The applicant's argument that Yamada et al. is silent with respect to a hollow capacitor element comprising an electrically-insulating layer formed on a metallic casing to cover at least a region extending from the open end of the metallic casing to a recess provided for fixing the opening-sealing plate, and the rubber like elastic member is pressed by the open end portion of the metallic casing. The examiner finds this argument persuasive. Therefore, the examiner allows this limitation over the prior art.

Allowable Subject Matter

3. Claims 1, 5, 11, 13, and 26-29 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 5, 11, 13, and 26-29, the prior art alone or in combination does not teach the limitation of a hollow capacitor element comprising an electrically-insulating layer formed on a metallic casing to cover at least a region

Art Unit: 2831

extending from the open end of the metallic casing to a recess provided for fixing the opening-sealing plate, and the rubber like elastic member is pressed by the open end portion of the metallic casing.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation Relevant of Prior Art

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Lin (US 6,292,348) discloses surface mounted capacitor.
- b. Kobayashi et al. (US 6,181,543) disclose high voltage ceramic capacitor.
- c. Azumi et al. (US 5,587,869) disclose high-voltage capacitor manufacturing method and high voltage capacitor.
- d. Fujimoto et al. (US 5,683,834) disclose nanoqueous secondary battery.
